Case Study - GIIS

Project Background

GIIS Singapore new campus has started construction work of two main buildings since 2016. With the aim of building a school with state-of-the-art technology, the school IT team came to us. We offered them a proposal for the smart classroom and smart campus development.

 <https://globalindianschool.org/tech-enabled-learning/digital-classrooms/>

Customized system for GIIS new campus

- IQTouch Interactive Flat Panel & IQ Interactive Education Platform Software for interactive teaching environment
- Q-NEX Networked Media Processor & Q-NEX Console for centralized and remote control of classroom devices

Higher Education

UK - BPP University

Project Background

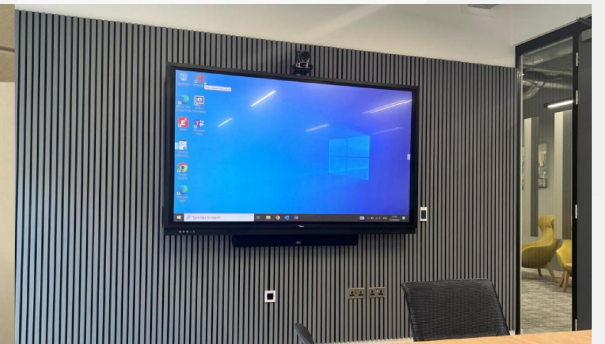

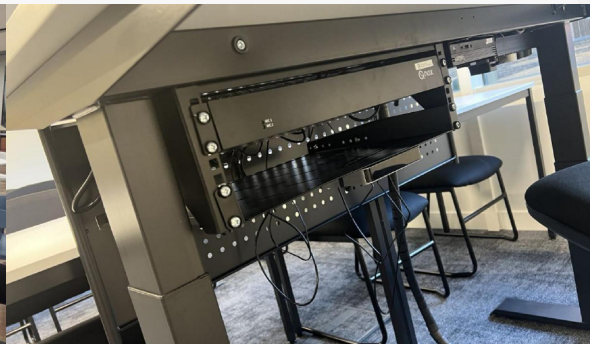

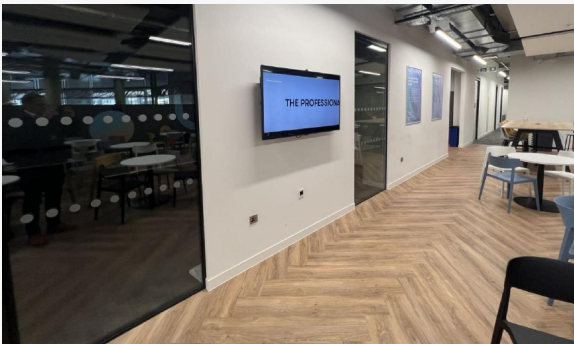

BPP university, established in 1992, comprises four schools in the United Kingdom. With the increasing number of enrolments, BPP university has grown at a rapid pace.

For a large amount of complex school equipment, an IoT-based campus with digital transformation and cloud centralized device control is extremely required.

Q-NEX Solution to Build A Smart School

- Faculty-Friendly AudioVisual Sharing Environment
- IoT-Based School Device Management
- New Concept of "Divisible Classroom"

- (1) One Classroom with Partition for Multipurpose Application.
- (2) Multiple Classrooms with Device Independent Control / Full Control.
- (3) AV Broadcast and Central Control in Divisible Classrooms.

Myanmar

Working with the Ministry of Education to help

60 top-rated technical universities across the country for a modernization initiative. Ambitiously utilizing smart campus automation and AV technologies to benefit students, educators, and staff, eventually the project seeks to nurture a more highly educated workforce to accelerate the country's development.
